

# INDIVIDUAL MODULAR EXPANDABLE

**ASZ + 2 PBZ = MPZ-DUAL**

**MPZ-DUAL**

**THORWESTEN**

## MPZ-DUAL – THE DOUBLE PERFECT CONNECTION

MPZ-DUAL – Two PBZ, one automated material flow, maximum efficiency. Our solution for flexible and high-performance manufacturing. The combination of an automatic sawing center (ASZ) and two profile machining centers (PBZ) creates an intelligent unit for a continuous material flow. Cut-to-size profiles are forwarded automatically, machining processes run in parallel, waiting times are reduced, and capacities are utilized optimally.

The modular concept allows for individual adaptation and subsequent expansion – for manufacturing that works efficiently today and grows with your requirements tomorrow.

- Automated transfer from ASZ to two PBZs
- Parallel processing for higher productivity
- Higher output with shorter waiting times
- Saves labor and operating effort
- Flexible material flow according to your requirements
- Optimized buffer and material logistics
- Increases the material buffer
- Expandable through automatic steel cutting (BSZ)
- Increases machine utilization

Do you have questions about the design, the function, or the operation of the new MPZ-DUAL? Please feel free to contact us!
