

THE PERFECT COMBINATION

ASZ + PBZ = MPZ

MPZ MODULAR PROFILE
MACHINING CENTER

THORWESTEN

MPZ – THE PERFECT CONNECTION

ASZ + PBZ = MPZ – The modular profile machining center. Our formula for a perfect and efficient connection. The connecting table creates a complex unit from our automatic sawing center (ASZ) and the profile processing center (PBZ), which saves labor and also serves as a work surface. All steps for further processing are completed here.

This reduces machine maintenance times, makes the operator more flexible, increases the material buffer and boosts machine utilization. From blank to finished profile.

- Automated transfer from the ASZ to the PBZ
- Saves labor
- The buffer can be loaded and unloaded according to your requirements
- Efficient labelling
- Problem-free steel insertion
- Reduces machine waiting times
- Increases the material buffer
- Increases machine utilization

Do you have questions about the design, the function, or the operation of the new MPZ?
