

# ASZ + PBZ = MPZ THE PERFECT COMBINATION

VT CONNECTING TABLE

## VT – THE PERFECT COMBINATION

**ASZ + PBZ = MPZ** the modular processing centre. Our formula for a perfect and efficient combination. The VT connecting table is formed from our ASZ automatic profile cutting centre and the PBZ profile processing centre, creating a complex unit that saves labour and simultaneously serves as a work surface. All further processing stages are completed here, which reduces machine waiting times, increases the flexibility of the operator, enlarges the material buffer and raises machine utilisation. From blank to finished profile.

PRODUCTIVE

Should you have any questions about the design, function or operation of the new VT we will be happy to help you. Just give us a call!

FLEXIBLE

## THE VT CONNECTING TABLE

- automates the transfer from ASZ to PBZ
- saves labour
- serves as a work bench
- ensures efficient labelling
- provides smooth steel infeed
- reduces machine waiting times
- enlarges the material buffer
- raises machine utilisation
